Additional services

• Pediatric cranial remolding performed with state of the art scanning equipment that is less invasive than the casting methods and allows start to finish comparisons that are more accurate than conventional methods. We also offer wigs, hats, and scarves for Pediatric and Adult hair loss due to Cancer, Chemotherapy, alopecia, trichotillomania and other medical conditions.

Each individual is carefully evaluated in order to provide the optimum fit, whether it is an off-the-shelf item or something custom fabricated.

We guarantee our best efforts as a priority for patient satisfaction. We are a patient driven practice and believe that when you satisfy your patients, success will follow.
